Demo: Register an app with the Microsoft Identity platform

In this demo you'll learn how to perform the following actions:

- Register an application with the Microsoft identity platform

Prerequisites

This demo is performed in the Azure Portal.

Login to the Azure Portal

1. Login to the portal: **https://portal.azure.com**

Register a new application

1. Search for and select **Azure Active Directory**. On the **Active Directory** page, select **App registrations** and then select **New registration**.

2. When the **Register an application** page appears, enter your application's registration information:

Field	Value
Name	az204appregdemo
Supported account types	Select **Accounts in this organizational directory**
Redirect URI (optional)	Select **Public client/native (mobile & desktop)** and enter `http://localhost` in the box to the right.

Below are more details on the **Supported account types**.

Account type	Scope
Accounts in this organizational directory only	This option maps to Azure AD only single-tenant (only people in your Azure AD directory).
Accounts in any organizational directory	This option maps to an Azure AD only multi-tenant. Select this option if you would like to target anyone from any Azure AD directory.
Accounts in any organizational directory and personal Microsoft accounts	This option maps to Azure AD multi-tenant and personal Microsoft accounts.

3. Select **Register**.

Home > App registrations > Register an application

Register an application   ✕

* Name

The user-facing display name for this application (this can be changed later).

ContosoApp_1   ✓

Supported account types

Who can use this application or access this API?

◉ Accounts in this organizational directory only (Contoso Enterprises)

◯ Accounts in any organizational directory

◯ Accounts in any organizational directory and personal Microsoft accounts (e.g. Skype, Xbox, Outlook.com)

Help me choose...

Redirect URI (optional)

We'll return the authentication response to this URL after successfully authenticating the user. Providing this now is optional and it can be changed later, but a value is required for most authentication scenarios.

Web ⌄	https://contosoapp1/auth ✓

Register

Azure AD assigns a unique application (client) ID to your app, and you're taken to your application's **Overview** page.

✔ **Note:** Leave the app registration in place, we'll be using it in future demos in this module.
